Supplementary Table 5. The eGFR at dialysis initiation according to comorbidity index excluding continuous renal replacement therapy patients (n = 1,024)

Variable	Planned dialysis (n = 683)		Unplanned dialysis ^a (n = 341)		eGFR difference	n voluo ^b
	No. (%)	eGFR	No. (%)	eGFR	(unplanned - planned dialysis)	p-value ^o

eGFR, estimated glomerular filtration rate.

^aUnplanned dialysis group was defined as starting maintenance dialysis in a life-threatening situation regardless of a permanent access device in place. ^bWe compared eGFR at dialysis initiation between the planned dialysis group and unplanned dialysis group.
