

Supplementary Table 7. The number of interaction p-value > 0.05 in the iterative 1,000 matching analysis when diabetes is not included as a matching variable

Donor * year	Diabetes	Hypertension	Hyperuricemia	Hypercholesterolemia	Overweight /obesity	Metabolic risk factors ≥ 3
1995–2000	Reference					
2001–2006	1,000	995	993	813	807	163
2007–2011	1,000	993	1,000	956	798	423
2012–2016	1,000	995	1,000	693	922	843
