

Supplementary Table 2. OR of covariates to intradialytic hypotension including tertile groups by the ratio of SMM (kg) to WT (kg) in the multivariable logistic model

Variable	OR (95% CI)	p-value
SMM/WT		
Middle SMM/WT (vs. low SMM/WT)	0.30 (0.98–0.88)	0.03
High SMM/WT (vs. low SMM/WT)	0.06 (0.01–0.29)	0.001
Age	1.00 (0.97–1.05)	0.81
Male sex (vs. female)	0.87 (0.30–2.49)	0.79
DM (vs. non-DM)	5.00 (1.95–12.80)	0.001
Cardiovascular comorbidities ^a (yes vs. no)	1.81 (0.72–4.54)	0.21
Cardiac index	0.96 (0.89–1.04)	0.33
Ultrafiltration per weight	1.70 (1.22–2.35)	0.002

CI, confidence interval; DM, diabetes mellitus; OR, odds ratio; SMM, skeletal muscle mass; SMM/WT, percentage of SMM to WT; WT, dry body weight.

^aCardiovascular comorbidities include chronic heart failure or ischemic heart disease.
