Supplementary Table 1. Comparison of AR, infection rate, and DGF according to induction therapy in elderly and young subgroups in the entire cohort

Variable	Elderly (n = 118)			Young (n = 606)		
	Basiliximab (n = 69)	ATG (n = 49)	p-value	Basiliximab (n = 403)	ATG (n = 203)	p-value
AR	13 (18.8)	9 (18.4)	0.95	96 (23.8)	51 (25.1)	0.72
Infection rate	6 (8.7)	2 (4.1)	0.47	18 (4.5)	11 (5.4)	0.60
DGF	8 (11.6)	12 (24.5)	0.07	82 (20.3)	47 (23.2)	0.43

Data are expressed as number (%).

AR, acute rejection; ATG, antithymocyte globulin; DGF, delayed graft function.
