

**Supplemental Figure 1.** Cubic spline curves depicting the relationship between SBP or DBP and ESRD risk. (A, B) In CKD and (C, D) non-CKD subgroup. Adjusted for age, sex, income, diabetes mellitus, dyslipidemia, and hypertension, smoking, alcohol drinking, physical activity, and estimated glomerular filtration rate. CI, confidence interval; CKD, chronic kidney disease; DBP, diastolic blood pressure; ESRD, end-stage renal disease; HR, hazard ratio; SBP, systolic blood pressure.
